

SECTION 11 — CONCLUSION

The data contained in the MI-Access reports provide a great deal of information about student performance on the MI-Access assessments. They do not, however, provide all the answers to curricular and instructional questions. For that reason, it may be helpful to think of MI-Access results as one part of a much larger puzzle. The assessments provide some of the pieces, but educators and parents need to put them together with other data—and what they already know about the student—to see a more complete picture of the student's performance. The important thing is that, with MI-Access, educators and parents have reliable, concrete state-level information to help them.

In future years, the handbook will include sections (as it has in the past) on how to interpret and use MI-Access data to inform instruction and curriculum. The OEAA hopes this information will help parents and educators as they strive to increase learning and improve student achievement.
